As an FYI, I've been on several calls with R4 and AL ADEM about the new consent order and the air issues. To this point,

Previous work we did in Decatur AL was published in Newton et al., 2017 in EST see attached.

The PPT file is a synopsis of Seth work. The last slide is what I looked for in sample site #2 for relative abundance. You can see FBSA and PFBS are not the only or the biggest players. **Ex. 5 Deliberative Process (DP)**

Any contemporary samples taken of waste water or local water samples could be looked at for the suite of PFAS we are likely to see since we last looked in fall 2015 with our Auburn collaborators.

The past couple of days have been overwhelmingly packed for me and since I'll be out of the office next week, I don't see it getting any better anytime soon.

Sean,

I'll be off this Friday, so tomorrow or Thursday would be better.

If you could let me know what you're looking for I could possibly prepare a bit.

Thank you very much,

Andy
